○ horeca large 380

The best solution for your breakfast

horeca large 380

Easy use

horeca large 380, a perfect solution for hotel, touristic villages and mid-size communities thanks to its visible push buttons and clear selection labels, that make the drink choice easy.

High technology

User friendly and high technology to allow quick drink dispensing, high level performances and constant quality. Exceptional and long lasting results are granted.

Design

Essential and refined look, finished with inox steel to make cleaning easier and, like all the rheavendors group machines, simple to be taken down.

horeca large 380 is really the best solution for your breakfast.

User-friendly technology

A wide range of programming options ensure that a personalised drink can be achieved either via the machines display or with our rheAction support software.

The mixing bowls can be simply taken out and replaced.

Drinks served perfectly

horeca large 380 can offer a wide range of hot drinks, that can be dispensed as desired in cups, glasses, coffee mugs and jugs.

To serve the drink

Two drinks deliveries simultaneously. With jug: 20 seconds for 1 litre. Products quantity can be set up by the costumer.

Energy consumption

horeca large 380 allows remarkable energy savings through:

- weekly programmable switching on/off in the same time band, which keeps the machine in a standby temperature when inactive.
